

PROPOSED DEFINITIONS
SECTION 13.3 "FOREST CONSERVATION DEFINITIONS" of TOWN'S LDO

- **DEPARTMENT** means the Department of Natural Resources.
- **INTERMITTENT STREAM** means a stream in which surface water is absent during a part of the year as shown on the most recent 7.5 minute topographic quadrangle published by the United States Geologic Survey as confirmed by field verification.
- **PERENNIAL STREAM** means a stream containing surface water throughout an average rainfall year, as shown on the most recent 7.5 minute topographic quadrangle published by the United States Geologic Survey, as confirmed by field verification.
- **STREAM RESTORATION PROJECT** means an activity that is designed to stabilize stream banks or enhance stream function or habitat located within an existing stream, waterway, or floodplain; avoids and minimizes impacts to forests and provides for replanting on-site an equivalent number of trees to the number removed by the project; maybe performed under a municipal separate storm sewer system permit, a watershed implementation plan growth offset, or another plan administered by the State or local government to achieve or maintain water quality standards; and is not performed to satisfy stormwater management, wetlands mitigation, or any other regulatory requirement associated with proposed development activity.
